with colleagues
and friends

Get your content into Vibe
10 times faster!

Share content

Save thoughts & ideas
Collect information

Instantly blog and
discuss your ideas
in Vibe

Tag and comment
your content
while sharing

Quickly create
tasks during
a meeting

ShareOnVibe is an add-on for Firefox that dramatically speeds up sharing content from the browser into Vibe.

Use it for research, meeting minutes, To Do's, image collections, link lists, migration of content and more ...

- Share a web page's URL, title and description
- Share selected text
- Share images from web pages
- Share linked files like PDF, .odt, .doc, .xls...
- Share videos from YouTube
- Share your thoughts and ideas

- Drag & drop installation into Firefox
- Use it with Windows, Mac and Linux
- Works with any Vibe installation
- Easy to configure

Enrich your content while sharing it by adding tags and comments.

Configure your target folders to display shared content the way you like – e.g. as a task, an image, a blog post - using the power of Vibe!

„The charm of the tool - and the efficiency of sharing information with it - are based on its simplicity.“

Dr. Werner Degenhardt
Academic Director and CIO of the Faculty of
Psychology and Educational Sciences,
Ludwig-Maximilians-University Munich

Sharing web content into Vibe has never been easier!

Note: When folding, keep lines visible on the outside.
